Request

Video analytics and IT project management.

The Greek company is IT project mangement oriented and is looking for a mutual cooperation at this Basis.

We have good enough experience in video analytics and we are already running medium to large projects, good experience in airports and outdoor parkings.

From such projects are coming out supplementary or integrated products, this is the reason that we are looking for financial resources that will be used for product development.

We have ready proposals for product development.

Request

Reseller/distributor wanted (Service-management and PBX-IP Software)

Veritten is a complete software package driven to what is known as service management. It is suitable to be used in the areas of Service-desk/Help-desk, Customer care/Ombudsman Offices or Shared Services Center.

It can be used to automate the process of software development as well, with control of all activities since end user request, including analysis of expectations, coding and testing until the delivery of new system or package. There are plenty of resources and functions available to assist in controlling overall service management process, in a continuous improvement methodology. We are looking for partner interested in resell or distribute Veritten and its portfolio abroad.

Offer

Desktop applications

We can provide you with a specialist service, delivering cutting edge information solutions for your business. Whether it is a web based application, which can be used through a web browser, or a desktop application that seamlessly links with your website, we will provide the solution that is right for you.

Marble & Granite Warehouse & Production Management Software

Veritten has developed a vertical business software application that allows Marble & Granite firms to fully monitor, manage and control their production & warehouse data. The application allows the firm to have a detailed view of warehouse stocks, movements, productions and cuts. The solution is coupled with a marble barcode solution that includes special Windows Mobile application for fully managing the marble warehouse using barcode tags and serial numbers.

TARGET PARTNER SOUGHT (Expertise, Type, Country)

We are looking for partners that are able to promote and resell our business software world wide and specially in the Arabic world, China, India and Latin America

INNOVATIVE ASPECTS

The solution is based on deep vertical knowledge. Marble/Granite warehouse management is based on unique informational demands fully fulfilled by our solution

CURRENT STAGE OF DEVELOPMENT

The software is already developed and sold in Greece, Poland, USA, Libya. We are looking for fast expansions world wide
